

stairmateTM STANDARD

Powered stairclimber for manual wheelchairs

The Stairmate Standard is easy to use and will provide safe and reliable access or evacuation for a manual wheelchair and passenger up or down stairs. This affordable and proven product can be used indoors or outdoors on any suitable stairs or steps.

Supplied with removable battery pack, charger, stair angle indicator and comprehensive instruction book.

Extremely compact for storage, fitting easily into the boot of a car.

options

The platform option enables children's and sports wheelchairs to be carried with ease. (option code: SPL).

The seat unit provides stair access without the need of a wheelchair. (option code: SAS).

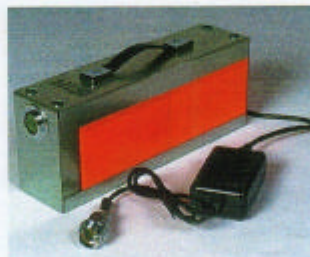

The adaptors to accommodate wheelchairs with small rear wheels require no tools to fit. (option code: SSR).

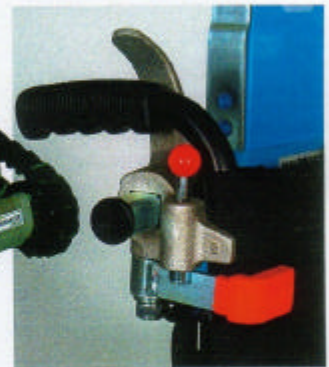

Used with the platform option, the alternative wheelchair support brackets allow the use of wheelchairs without push handles. (option code: SBR).

Also available: Adjustable Back Clamp (option code: SAC) for wheelchairs with fully upholstered back rests etc.

Both Stairmate products feature removable battery packs with high tech sealed cells and battery chargers.

Robust brackets with safety catches securely hold the handles of the wheelchair.

The user friendly controls include a charge indicator to give plenty of warning to recharge or fit a spare battery pack.

Deep cleated reinforced tracks, a powerful motor and gearbox combination with electro magnetic braking and a removable battery pack ensure safe and reliable continual use.
